Autumn ReadMe

Dependencies

Dependency	License
Guava	Apache 2.0
ObjectWeb ASM	Apache 2.0
Snowflake[1]	Apache 2.0

These dependencies are already included in the "lib" directory.

I would like to thank the developers of Guava and ObjectWeb ASM for their libraries. Without these dependencies, the Autumn compiler would have been much harder to develop. These libraries are greatly appreciated.

---

1 Snowflake is also a project created by Mackenzie High. Snowflake started as a sister project to Autumn.
